Education

Dr. A.P.J. Abdul Kalam Technical University, Lucknow

Sep 2020 – Aug 2024

Bachelor of Technology in Information Technology | CGPA: 7.31/10

- Relevant Coursework: Data Structures, Algorithms, DBMS, Web Development, Software Engineering

Experience

Full-Stack Developer — Robust Results Private Limited

Jul 2023 – Nov 2023

- Developed and maintained web applications using the MERN stack, optimizing database queries and API response times
- Implemented full-stack features including JWT-based user authentication, RESTful APIs, and responsive UI components with React and Redux
- Integrated third-party APIs and improved front-end performance and cross-browser compatibility

Projects

MediCare HMS — Healthcare Management System

2024

React, Node.js, Express, MongoDB, Socket.io, WebRTC, Razorpay | AI-Assisted Development

- Built a full MERN healthcare platform with real-time chat (Socket.io) and WebRTC-based video/audio consultations between doctors and patients
- Integrated Razorpay for payments, Nodemailer for email notifications, and jsPDF for auto-generated prescriptions
- Implemented Cloudinary image uploads, Redux Persist, and role-based dashboards for admin, doctor, nurse, and pharmacist
- Deployed on Vercel; resolved critical bugs including auth crashes and doctor online-status sync issues

Amrit Hospital Management System

2024

React, Node.js, Express, MongoDB, JWT | AI-Assisted Development

- Developed a multi-role hospital management app with JWT authentication and dashboards for admin, doctor, nurse, and pharmacy
- Built RESTful APIs with Express and MongoDB for patient records, appointments, and pharmacy inventory
- Debugged and resolved a production server crash caused by a faulty route export, and streamlined the Git deployment workflow

E-Commerce Platform

2023

React, Node.js, Express, MongoDB, Redux, JWT, Stripe API | AI-Assisted Development

- Built a full-featured e-commerce application with authentication, product catalog, cart, and Stripe-based payments
- Implemented an admin dashboard for inventory, order tracking, and role-based user management
- Designed a responsive UI with React and Bootstrap, achieving a 95+ PageSpeed score

Dairy Management System

2024

React, Node.js, Express, MongoDB, JWT | AI-Assisted Development

- Built a MERN-based system to manage milk collection, inventory, and billing for dairy operations
- Designed REST APIs and MongoDB schemas for tracking daily collection records and generating billing reports
- Implemented role-based access with JWT authentication for staff and admin users

Technical Skills

- Languages: JavaScript (ES6+), HTML5, CSS3
- Frontend: React.js, Redux, Bootstrap, Tailwind CSS, Responsive Design
- Backend: Node.js, Express.js, RESTful APIs, JWT Authentication
- Databases: MongoDB, Database Design
- Tools: Git, GitHub, Postman, VS Code, Socket.io, WebRTC
- AI Tools: Claude, ChatGPT (used for debugging, code review, and rapid prototyping)

Certifications

- MERN Stack Development — Coding Blocks, Delhi
- Full Stack Development — IIT Kanpur (Prutor.ai)
